PRAISE GOD! Haiti, Jamaica, Belize all have experienced KIDS EE CLINICS this year!

Trainers from Illinois with children of Canterbury

Navigating the gully through Canterbury

## Jamaica

The clinicians had set their sights on Canterbury, one of the most desperate areas of Montego Bay. Running through the center of Canterbury is a gully filled with sewage from Montego Bay. Tin shacks crammed full of people line the gully. Narrow alleyways are the only way to navigate through this slum where there are obviously no roads, only trails.

In July, Don helped teach this Jamaican Youth EE Clinic where amazing things happened. The clinicians decided to do a prayer-walk throughout the area and saw God clear a path for evangelism.

Three drug lords who ruled this slum had imposed a 6 p.m. curfew. Everyone had to be in their houses so that the drug deals could begin in earnest. After this area had been prayer-walked prior to the clinic, God conveniently removed them. One was in jail, another had fled the country because of a threat on his life, and the third seemed to have disappeared. The teams and residents were now able to move freely about without threat to their lives.

Prior to the clinic, none of the clinicians had ventured into Canturbury. During the clinic many people from Canturbury prayed to receive Christ. We saw God break through strong holds as the local clinicians overcame their fear to enter this area with a passion for lost souls and a boldness to proclaim the gospel. Many decisions for Christ continue to be .made in this desperate place.

Come join us in Canterbury!

### Albania in July

On June 29<sup>th</sup> we departed from CRPC for Europe, accompanied by 90 youth and adults to conduct 8 Youth EE Clinics and Seminars in 6 countries. Eleven of us, including our 7 year old daughter, Braman, split off from the others in Brussels, Belgium, heading to our clinic destination of Tirana, Albania. God had prepared the way before us.

Tirana is a city whose population was about 100,000 people when communism fell in 1990. The city has swollen to one million people without any change in infrastructure. To say it is overcrowded is an understatement. This was emphasized as the water was turned off most of the time we were there.

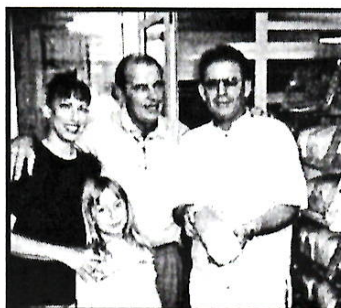

Some of the homes we visited were small spaces in abandoned factories the people had captured. The conditions were very crude, yet three or more generations were sometimes crowded into the space they called home.

The church where we held the clinic has a bakery which delivers bread to 500 people six days a week. Although the church had been delivering bread, they had not yet shared the "Eternal Bread of Life". Because they are now better equipped to share their faith through the ministry of EE, they can feed not only the bodies of these people, but also their souls for eternity.

Although the clinic was small, we saw God at work in a powerful way. We visited these homes, sharing the gospel with mostly Muslims. 72 prayed to receive Christ.

### Albanians in Greece in October

In October Don went to a missions conference in Corfu, Greece to meet with ethnic Albanians from around the Balkans. He shared EE with mission organizations, national pastors and leaders. Six clinics are planned for 2002 in Albania. By God's grace, we plan to help teach four of these clinics.

Pastor Muco's bread ministry

Always pray first!

## **Haiti**

Don had an exciting meeting in November with Pastor Chavene Juene, President of Mission Evangelistic (MEBSH) of South Haiti. In July 1999, Don organized one of the largest EE Clinics ever held with 630 clinicians, many from MEBSH. Pastor Juene told Don that this year over 10,000 people have prayed to receive Christ, had church membership training, been baptized and admitted into the church. PRAISE GOD! And now, he wants to have all 1,000 of his churches trained in the ministry of KIDS EE.

## **God's Plan**

God had a new plan for the first KIDS EE Clinic in Haiti. Clinics are to train children's workers how to share the gospel effectively with children. As Don was following the clinic schedule, God showed Don another schedule. The first day of the clinic, neighboring children heard that "something for kids" was happening at the church. That afternoon they showed up to see what was going on. When Don invited them in, every chair was filled. God knew they were coming even if Don didn't! The clinicians were then able to experience real time training with the kids. What wasn't in the clinic schedule was in God's schedule.

**Praise God for all He's doing with Kids EE in Haiti and Belize!**

## **Testimony from Haiti**

Pastor Borromeo La Guerre wrote: "...I was about to cross a region, suddenly I met a man I didn't know before. God had put into my heart the idea to share the Gospel with him. And I did it according to the principles of EE. That man was involved in voodoo. In the coming day, he was planning to kill someone with an egg that he held in his hand. After presenting the gospel, that voodoo man accepted Christ as his Savior and Lord. He shared his testimony with me. He gave me the egg and took me to his home and we publically burned all of his other voodoo stuff. Now that man is serving the Lord."

## **Belize**

In Belize, the first KIDS EE Clinic brought together 55 pastors and teachers. As they learned KIDS EE tools for sharing the Gospel, several of the pastors returned to their churches and used this new ministry. In amazement they found that their children DID NOT understand the gospel. When asked "Why should God let you into heaven" they gave "works" answers. These pastors said that EVERY pastor needed to be trained to use this tool. And, every church and school whose pastors and teachers attended this clinic are now using this ministry. Praise God.

# Family Evangelism

**Don and Braman in an Albanian bunker.**  
Wish you were here!

**Don, Suzy, & Braman teaching together**  
at Moody church in Chicago.

## **Coral Ridge Presbyterian Church in October**

At the beginning of October Don co-taught a KIDS EE Clinic at our church. The clinicians were men and women from all over the world. Represented were: Finland, Germany, Chile, El Salvador, Jamaica, Canada, and others from across the U.S.

As the clinicians were sharing testimonies at the end of the session, a school teacher from Finland stood and very dramatically said,

**“I have been teaching children for 30 years and I have been SO BORING! I am now going home and with what I have learned here, I am not going to be BORING anymore! The students are now going to have fun as they learn.”**

## **Jamaica**

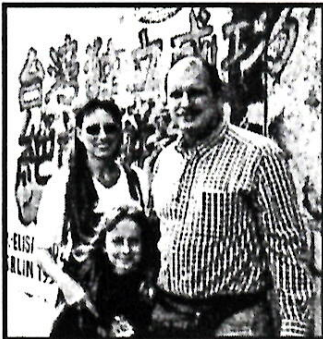

We spent thanksgiving in Jamaica teaching the first KIDS EE Clinic there. The excitement was high for the clinicians and kids. The kids learned the scriptures and skits to share the gospel. On Sunday the kids impressed the congregation with their animated presentations.

## **The Future is up to YOU!**

With all that we have seen God accomplish this year and for what is already scheduled for 2002 in just Haiti, Jamaica, Belize, and Albania alone, we have a busy year ahead.

Wouldn't you love to be a part of our future and theirs? Is God calling you to help? Please keep these people and our desire help train them in your prayers and consider supporting our desire to help train and equip the saints for evangelism!

May God bless you and keep you.
